SAFE EYES – THE TOP-RATED PARENTAL CONTROL SOFTWARE – HONORED WITH PC MAGAZINE’S PRESTIGIOUS EDITOR’S CHOICE AWARD

Atlanta, GA, April 19, 2006 – SafeBrowse, creator of the industry’s most trusted and highly rated parental control software, announced today that Safe Eyes 2006 has received PC Magazine’s Editor’s Choice award, the publication’s highest honor. PC Magazine’s review of the product is scheduled to be published in Issue 8, due on newsstands the week of April 24. The PC Magazine award follows Safe Eyes’ top rating in 2005 by the nation’s leading consumer research organization.

“We’re honored that PC Magazine recognizes Safe Eyes 2006 as the most up-to-date, comprehensive filtering tool available today for concerned parents who want a product they can trust to monitor and control their children’s Internet use,” said Shane Kenny, president of SafeBrowse. “We founded SafeBrowse in 1999 to provide Internet protection for families, introduced the first version of Safe Eyes in 2003, and have continued to upgrade our product to ensure its safety and effectiveness. We’re proud that Safe Eyes has received this important distinction at a time when more and more parents recognize the need for installing filtering software on their home computers.”

PC Magazine cites Safe Eyes as “The Ultimate Parental Control App” for “the modern multi-computer family.” The review praises the software’s effectiveness at allowing parents to control their child’s access to the web and Internet-based programs, as well as time spent online. It also highlights Safe Eyes’ ability to monitor Instant Messaging and alert parents immediately when a child wanders into inappropriate content.

Affordable, easy to install, and with customizable options, Safe Eyes 2006 offers the following key features:

- Content Control
- Program Control
- Usage Logging
- Time Control
- Usage Alerts
- Pop-Up Blocker

Available for both PC and Mac computers, **Safe Eyes 2006** is available directly at www.safeeyes.com. Priced at only \$49.95 annually, Safe Eyes may be installed on up to three computers for no additional charge. The software comes with preset categories that can easily be tailored to fit the specific needs of a family or organization.

SafeBrowse is an Internet technology company specializing in the development of content control products that benefit families, businesses, schools and churches. Founded in 1999, SafeBrowse is a pioneering leader with its Flexible Filtering™ technology that runs on both Mac and PC. Safe Eyes™ parental control software for home computers was chosen as the No 1 filtering product by the leading consumer testing agency. EtherShield utilizes the same award-winning technology for filtering small business networks. SafeBrowse serves customers in more than 70 countries in the Americas, Europe and Asia.
