

# Ethershield 1.2.1 Release Notes

---

September 10, 2007

## What's new in Ethershield 1.2.1

### Issues Solved

- Fixed the database start link.
- Made spooler database connections more fault tolerant and robust, solves logging problems.
- Updated Ethershield Remote network configuration input to be more logical.
- Fixed bug that allowed transfers to undefined policies.
- Added link for major as well as current firmware release notes on home page.
- Provide link to reboot Ethershield after changing network configurations.
- Fixed link to Ethershield Remote server pages.

### New Features

- There are no new features in this release.

## Downloading and Installing

To download and install the update, just point your browser to <http://admin.ethershield.com>, and log in. Click on "Software Updates" and "Check for Updates". You should then see a screen showing you your current version details, as well as the details of the new version. All you need to do then, is click on the "Install Version 1.2.1" button. Your Ethershield will download and install the update, and restart automatically. The entire process may take a few minutes depending on your bandwidth. Do not close your browser window while your Ethershield is downloading the new firmware. During the update process, content control and Internet access may be temporarily unavailable.

## Known Issues

There are no known issues associated with this release.
